

Release Notes for Patch Release #5945
2021-02-09

Security Patch Release

This Patch Release addresses critical vulnerabilities; please consider deploying it as soon as possible. Not deploying this Patch Release may result in remote service exploitation, security threats to users and exposure of sensitive data.

Detailed vulnerability descriptions will be publicly disclosed no earlier than fifteen (15) working days after public availability of this Patch Release. There is no indication that one or more of these vulnerabilities are already getting exploited or that information about them is publicly circulating.

2 Vulnerabilities fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5937. Solutions for vulnerabilities have been provided for the existing code-base via Patch Releases.

OXUIB-645 CVE-2021-26698

CVSS:3.1

MWB-839 CVE-2021-26698

CVSS:3.1

MWB-838 CVE-2021-26698

CVSS:3.1

DOCS-3139 CVE-2021-26699

CVSS:3.1

3 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5937.

DOCS-2921 Comment Anchor does not work / function unclear

In the specified environment, the comment ID was transferred to OX Presentation, but it was not found in the parameters of the application launcher.

This has been solved by finding and evaluating the transferred comment ID in application launcher for OX Presentation.

OXUIB-536 Signatures not above quoted text on forwarded mail

ForwardUnquoted was not recognized by plaintext editor.

This has been solved by adding forwardUnquoted detection for plaintext editor.

DOCS-2619 Readerengine scratch directory fills up

PDFTool does not return at all with some rare, yet unknown PDF documents.

A maximum runtime needs to be introduced for each call to the PDFTool (similar to watchdog for RE processes), returning an error after the configured jobExecution timeout time and responding to the appropriate request in time.

MWB-868 Dataexport fails with "No such file or directory" error message

Intermediate clean-up task unexpectedly drops file storage resources.

This has been solved by not running clean-up task when there are currently running data export tasks.

OXUIB-660 User can remove read permissions to (default) calendar results in inaccessible calendar

Was caused by missing check for admin rights.

This has been fixed by not filtering the calendar if the user has still admin rights.

4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5 Fixed Bugs
