2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #5989.

OXUIB-733 OX Webmail - After some Onclick action focus does not move

Focus was not set to list after action.

This has been fixed by setting focus to next list item after action.

MWB-1052 Database error when searching for something like [-+*%][a-z]

Remaining whitespace in tokenized query after non-word characters have been replaced.

This has been solved by trimming pattern after replacing non-word characters in client-supplied token.

MWB-1024 Connection to database problems / DAV client(s) involved

Generic error returned when vCards exceed the maximum size during bulk import.

This has been solved by explicitly handling too large vCard during bulk import requests.

3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

OXUIB-733, MWB-1052, MWB-1024,
