2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6000.

OXUIB-845 Wrong help article referenced in subscribed dialogs

Was caused by wrong references.
This has been fixed by using right references.

OXUIB-818 Appointments in public folders can not be edited, resulting in endless loading

Appointments were drawn before the 'injectVirtualCalendarFolder' was called.
Now register change listeners for appointments with incomplete folder data to solve this.

MWB-1106 No calendar listed - FLD-1001 NPE

Was caused by a NPE while sorting display names.
This has been fixed by adding null guard and by preventing null values.

MWB-1000 DefaultSenderAddress not used when composing new mail

From address determined by examining user's primary mail account data.
Orderly pre-select user's default send address when composing new mails to solve this issue.

OXUIB-870 "What's New Popup" does not honor the Customers Configuration

Feature checks were not sufficient.
Federated sharing text now also checks if filestorage_xox or filestorage_xctx capabilities are present.
Onboarding wizard now checks for capability client-onboarding and if the setting for the new wizard is actually enabled (io.ox/core//onboardingWizard).

OXUIB-852 What is new in this version Information modal displayed in attachment preview

Missing customization for what's new feature list.
This has been solved by adding extension point to customize this list.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

OXUIB-845, OXUIB-818, MWB-1106, MWB-1000, OXUIB-870, OXUIB-852,
