2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6008.

OXUIB-891 Signatures can duplicate if you hit save multiple times

Was caused by missing differentiation between success and error state.
This has been solved by idling dialog only when error was returned.

MWB-1148 Package referenced in docs (open-xchange-mail-authenticity) does not exist

Wrong package in mail authenticity config documentation.
This has been solved by using correct package in mail authenticity config documentation.

OXUIB-684 AppSuite Help - Index links non-existent

For some cases, the resolving of the index targets seems to fail for html output, while it works for pdf output.

This has been fixed by removing all links from the Index to the glossary terms for html output.

OXUIB-876 Attachments deleted from draft return after saving draft

Attaching a large file and then deletes/cancels while it's uploading led to an error.

This has been fixed by fetching pendingUploadingAttachments and pendingDeletedAttachments during the upload process to cover more edge cases.

OXUIB-888 Closing a (huge) mail draft with a double click results in an error

Multiple clicks on close button were possible.

This has been solved by disabling buttons in window header when app is closing.

OXUIB-890 Icon highlights in AM1_prod_reseller

The launcher drop-down moved to the left edge of the top bar and received its own section name in CSS.

This has been solved by adding the new section to the others where topbarHover is applied.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

OXUIB-891, MWB-1148, OXUIB-684, OXUIB-876, OXUIB-888, OXUIB-890,
