## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6035.

### **MWB-1248 Attachment downloads not working when app password used**

RestrictedAction.Type was missing from the getAttachmentAction.  
This has been solved by adding missing action type.

### **OXUIB-1025 Accessing shared files in a certain order fails**

Failed virtual folder "request" caused error and error handler failed as 'error' and 'options' were undefined.  
This has been solved by adding fallback for 'error' and 'options'.

### **OXUIB-1023 Permissions dialog does not support link-only case anymore**

Feature were accidentally removed during refactoring.  
This has been solved by adding feature again.

### **MWB-1252 Compose starting from Drivemail saved draft containing attachments does not have attachment size information**

File attachment size not correctly advertised on mail and composition space retrieval calls.  
Now orderly advertise file attachment size on mail and composition space retrieval calls.

### **MWB-1268 Explicit deleting of draft from mail draft folder does not delete corresponding drivemail draft folder from drive**

Referenced shared attachment folder not removed on message deletion.  
This has been fixed by dropping referenced shared attachment folder on message deletion.

### **MWB-1267 Deleting drivemail draft via DELETE mail/compose/draft.xxxx does not delete drivemail draft folder from drive**

Drive Mail folder not dropped when composition space is closed.  
This has been solved by also dropping Drive Mail folder when composition space is closed.

### **MWB-1272 Content-Type: message/delivery-status not shown in App Suite**

Message's delivery-status was not displayed.  
Now display message's delivery-status.

### **OXUIB-963 2fa not working with form/token login anymore**

Rampup extensions trying to fetch data without session requiring multifactor.  
This has been fixed by exiting the rampup stage early if multifactor is required after login.

### **OXUIB-899 Drivemail: auto switch is done too late to prevent overquota issues**

There is no check if the email exceeds the available storage space before it is forwarded to the backend.  
A check, if the email exceeds the available storage space before it is forwarded to the backend, has been implemented. Furthermore, a dialog with a corresponding hint has been implemented to indicate the switching to DriveMail.

**OXUIB-976 Mobile onboarding wizard - Upsell only available for EAS / CalDAV/CardDAV missing**

Unnecessary double capability check, which broke upsell configuration. This has been solved by just checking for one capability for each entry.

**MWB-1265 Password reset link not invalidated after setting new password**

Password change not forwarded to cross-context database. Align guest reference in cross-context database after setting new password in "reset" dialog to solve this issue.

### 3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

### 4 Fixed Bugs

MWB-1248, OXUIB-1025, OXUIB-1023, MWB-1252, MWB-1268, MWB-1267, MWB-1272, OXUIB-963, OXUIB-899, OXUIB-976, MWB-1265,
