2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6068.

MWB-1394 Drivemail: share expiration is wrong if user timezone is not GMT+0
Client-wise specified expiration date got adjusted by user's time zone.
Now passing client-wise specified expiration date as-is (assume GMT+0) and do not adjust by user's time zone to solve this issue.

MWB-1384 Birthday / Public calendar shows no entries when using czech language settings
This has been solved by fixing a typo in Czech .po file.

OXUIB-1042 Calendar entry can not be modified (empty popup, UI hangs)
Missing organizer caused js error in UI.
Solution: Make UI more robust so it doesn't break if an appointment has no organizer.

OXUIB-1221 Grammatical Error in German Getting Started Tour
This has been solved by adjusting trivial grammatical error.

OXUIB-1024 Skewed Images After attaching them during mail compose
Editing an image with the createImageBitmap function within a worker in Chrome Browser version > = 77 leads to incorrect results.
Solution: For Chrome Browser version > = 77, the editing process with createImageBitmap is no longer performed in the worker.

MWB-1319 Usercopy does not copy the user all the time
Possible SQL transaction timeout while trying to copy a user from one context to another: "Lock wait timeout exceeded, try restarting transaction".
This has been solved by following the suggestion from MySQL server and repeat the user-copy execution in case an SQL transaction timeout is encountered.

OXUIB-1094 Inconsistend mail draft handling movbile UI <-> Web UI
Wrong action type leads to creating a copy instead of editing the draft.
This has been solved by changing the type from 'copy' to 'edit'.

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

MWB-1394, MWB-1384, OXUIB-1042, OXUIB-1221, OXUIB-1024, MWB-1319, OXUIB-1094,
