2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6079.

MWB-1431 MSG-0008 Categories=ERROR Message='An I/O error occurred: Received BYE response from IMAP server: * BYE out-of-sync data before server greeting'

InputStream.available() might not indicate available content.

Solution: Probe for next byte instead of relying on InputStream.available().

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

MWB-1431,
