## 3 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6132.

**OXUIB-1065 Different order for displayed contact field than in edit mode**  
Mismatch in order of displayed contact fields.  
This has been fixed by moving fields to match edit form.

**OXUIB-1383 Compose a text-only email: row is moving immediately after typing**  
This was caused by a bug in the Chrome browser.  
This has been solved by adjusting an old fix for slow loading mail compose.

## 4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.
