3 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6149.

OXUIB-1768 Save a sent mail as distribution list - nothing happens

We introduced restrictions on apps that can be launched. This broke some actions with "closable" apps. Namely edit/create distribution list and invite to appointment actions.

This has been solved by introducing list of valid edit apps so the actions work again.

4 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on

both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.
