## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6161.

### **OXUIB-1764 Overflow of color picker in calendar on mobile devices**

Width of colorpicker was wider than screen width.  
This has been solved by setting max width to 100% to make all colors visible.

### **OXUIB-1790 "Back" in E-Mail List view is draggable**

Attribute 'draggable="false"' was missing.  
This has been solved by adding missing attribute to disable dragging.

### **OXUIB-1714 Unexpected and inconsistent success message shown when updating external account**

When a new account is created, it is classified as "new" until a refresh is executed. Therefore, "Account added successfully" is displayed until the refresh.  
A newly created account is now only recognized as new when it is created. Afterwards, "Account updated" is used.

### **OXUIB-1667 Other Address missing when printing a contact with print layout**

This was caused by typos in print.html and print-detail.js.  
This has been solved by fixing typos in print.html and print-detail.js.

### **OXUIB-1341 Translation suggestion for Swedish in UI**

Several change requests for Swedish.  
This has been solved by applying some changes and rejecting others.

### **OXUIB-1729 GDPR Export in 1GB packages not possible directly after an export with 512MB package size**

Max filesize was reduced to last selected size on redraw.  
This has been solved by saving the original max filesize.

### **MWB-1747 Amount of contacts displayed for distribution lists not always correct**

Distribution list entries were not correctly identified in case multiple entries had the same email address.  
This has been fixed by identifying the entries via their entry id.

### **OXUIB-1703 Mail compose jumps when inserting link**

Something in tinyMCE's paste plug-in caused the described behavior.  
This has been solved by updating tinyMCE.

### **MWB-1739 Pictures can not be opened for preview if browserwindow size is too big**

Client-given maximum width and maximum height of the target image exceed configured max. supported values.  
This has been fixed by adjusting client-given maximum width and maximum height of the target image to configured max. supported values.

**MWB-1733 ReplyTo field not used in case you send a mail to your own account**

The reply-to header was ignored in case the mail was sent to one's own mail address. Don't ignore the reply-to header to solve this issue.

**OXUIB-1811 CSS prefer-color-scheme gets ignored on body tag**

Wrapper css class got wrongly applied to body tag. This has been solved by adding exception handling for css rules on body tag.

**OXUIB-1717 Mail from sent mail folder is also archived when archiving from INBOX while in conversation view**

All mails in a conversation would get archived. Now only not-sent mails will get archived.

### 3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

### 4 Fixed Bugs

OXUIB-1764, OXUIB-1790, OXUIB-1714, OXUIB-1667, OXUIB-1341, OXUIB-1729, MWB-1747, OXUIB-1703, MWB-1739, MWB-1733, OXUIB-1811, OXUIB-1717,
