2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6255.

OXUIB-2564   Contact floating window does not update after move
Handling for "move" was missing.
Just added missing move-handling to solve this issue.

MWB-2299   Reply not possible for mails with embedded image/svg+xml images
Unsupported image format prevents from replying to a mail.
This has been solved by handling unsupported image format as illegal image upload.

OXUIB-2552   Reply not possible for mails with embedded image/svg+xml images
Middleware is unable to parse inline, base64 encoded images in 'img' tags.
This has been solved by removing inline SVGs from mails before issuing the first save action on a new composition space/draft.

MWB-2358   Database upgrade issue with appsuite
MySQL denies modifying a column belonging to PRIMARY KEY.
This has been solved by dropping PRIMARY KEY before modifying column belonging to PK, then re-create PRIMARY KEY.

MWB-2339   Issues with migration
Provisioning related log properties not dropped after log message has been issued.
Ensure provisioning-related log properties are dropped once the message has been logged.

MWB-2300   Customer cannot delete public folder (checkconsistency)
Optimized moving folder (and its subtree) to trash to solve this.

MWB-2376   S3 ERROR "SdkClientException: Parts are required to be uploaded in series " on upload of huge files
Wrong part number indicated in multipart upload to S3.
This has been solved by indicating the correct part number in multipart upload to S3.

3 Changes relevant for Operators

3.1 Changes of Database Schema

Change #SCR-1080   Aligned sizes for user name, mail login, primary mail address, and further user aliases
Have a max. common size of 191 characters for user name, mail login, primary mail address, and further user aliases. Related Update Task: `com.openexchange.groupware.update.tasks.ExtendUserFieldsTask`.

4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5 Fixed Bugs

OXUIB-2564, MWB-2299, OXUIB-2552, MWB-2358, MWB-2339, MWB-2300, MWB-2376,
