2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6264.

OXUIB-2649 Select button active by default in Contact Picker

Missing check for selection length.

This has been solved by adding check for selection length.

MWB-2410 Wrong random name for shared IMAP folders

IMAP entity's display name used when listing shared folders.

This has been fixed by adding config option "com.openexchange.imap.useIMAPEntityDisplayNameIfPossible" to control whether to use IMAP entity's display name when listing shared folders. Customer is supposed to set that property to false.

MWB-2403 Delete of user removes calendars of other users

Personal folder re-assigned to context admin if last changed by deleted user.

Solution: Ensure to only re-assign "changed_from" column upon user deletion.

MWB-2285 Drivemail image preview is not working in AppSuite 7.10.6

Was caused by NPE at AbstractCompositingIDBasedAccess.java:334.

This has been solved by avoiding NPE by explicitly setting an initial value.

MWB-2417 Cannot move a mail between folders inside an added GMail account with special characters in folder name

Message move operation did not consider possibly "UTF8=ACCEPT" capability when passing mailbox names.

This has been fixed by writing mailbox name as UTF-8 if IMAP server advertises "UTF8=ACCEPT" capability.

3 Changes relevant for Operators

3.1 Changes of Configuration Files

Change #SCR-1329 Added config option to avoid using IMAP entity's display name when listing shared folders

Added new lean config option com.openexchange.imap.useIMAPEntityDisplayNameIfPossible to control whether to use IMAP entity's display name when listing shared folders. Default is true

4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on

both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5 Fixed Bugs

OXUIB-2649, MWB-2410, MWB-2403, MWB-2285, MWB-2417,
