2   Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #6268.

OXUIB-2720   Sometimes images split to multiple pages when printing
This was caused by missing max-width.
This has been solved by adding max-width without an auto width.

OXUIB-2703   Flag-based sorting is broken due to outdated cached collection
This was caused by missing cache invalidation.
This has been fixed by adding missing cache invalidation.

OXUIB-2615   Invalid dates allowed for search
No check for an invalid day/month.
Now, if an invalid date will be detected during input, an error message is displayed.

MWB-2509   Mail: attachments of type .mht are silently discarded during send
Uploading multipart/* parts messed up mail's MIME structure during compose.
Now don't mess-up MIME structure by adding multipart/* parts through attachment API.

MWB-2496   Data export does not work on S3-Filestore for "large" archives
Unreliable S3 endpoint and no possibility to compile ZIP archives locally on the hard disk first.
Mitigate with possible "java.io.IOException: Resetting to invalid mark" when writing ZIP entries to file storage location. Added possibility to have ZIP archive compiled for a certain module being spooled to a local disk.

MWB-2420   Incorrectly formatted sender addresses lead to invalid sieve rules
Not able to parse addresses with multiple opening angles `'<'` e.g. `"<<jane@nowhere.com>>"`.
This has been solved by improving parsing routine to cope with multiple opening angles `'<'`.

MWB-2311   Calendar appointment overlap, no conflict when a resource is being overbooked
Event w/o set TRANSP value not found when searching overlapping events.
This has been solved by including events with unset TRANSP when loading overlapping events from storage.

3   Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.
    To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

OXUIB-2720, OXUIB-2703, OXUIB-2615, MWB-2509, MWB-2496, MWB-2420, MWB-2311,
