

# Release Notes for Public Patch Release

2013-10-21

Release No. 1672

## Security Patch Release

**This Patch Release addresses critical vulnerabilities; please consider deploying it as soon as possible. Not deploying this Patch Release may result in remote service exploitation, security threats to users and exposure of sensitive data.**

**Detailed vulnerability descriptions will be publicly disclosed no earlier than five (5) working days after public availability of this Patch Release. There is no indication that one or more of these vulnerabilities are already getting exploited or that information about them is publicly circulating.**

## 1. Shipped Product and Version

Open-Xchange AppSuite backend 7.2.2-rev25  
Open-Xchange OX6 backend 7.2.2-rev25

## 2. Bugs Fixed since last Public Patch Release

29315 CVE-2013-6241  
CVSSv2: 6.2

29147 CVE-2013-6074  
CVSSv2: 5.7

29136 NOOP command contains 127.0.0.1 if IPCheck is disabled  
When disabling com.openexchange.IPCheck and enabling the com.openexchange.imap.propagateClientIPAddress setting, NOOP commands will contain "127.0.0.1" as remote address for an EAS client. This has been fixed by keeping EAS clients IP addresses when IPCheck is disabled. Previously, the propagated IP address had been replaced by the IP address of the first request, which actually is done locally by USM, not the real EAS client.

## 3. Changes relevant for Administrators

### *Changes of Configuration Files*

- none -

### *Changes of Database Schemes*

- none -

### *Changes of Command Line Tools*

- none -

### *Changes of Behaviour*

- none -

### *Changes of Packaging*

- none -

## 4. Changes relevant for Developers

### *Changes of the HTTP API*

- none -

### *Changes of the RMI API*

- none -

### *Changes of the SOAP API*

- none -

### *Changes of the WebDAV API*

- none -

### *Changes to the Frontend API*

- none -

## 5. Tests

The OX QA team has verified all bug fixes.

To avoid side effects the packages have gone through automated smoke and regression test on both, the OX Build System and a distributed OX QA server setup.

In addition all bug fixes have been checked for potential side effects or changed behavior. Unless explicitly stated with one of the bug entries above, we do not expect other side effects.

## 6. Fixed Bugs

29315, 29147, 29136
