

Release Notes Public Patch Release

#1745 (2013-12-03)

1. Origin Product/Version

OX App Suite 7.4.1-Rev 5 (backend)

2. Packages shipped with this Release

OX App Suite 7.4.1-Rev 6 (backend built 2013-12-03)

3. Bugs Fixed with this Release

- 29823 timeouts while sending mail, followed by 503 and Java OOM
Acquiring a piped input stream for a MIME part was delegated to a new thread w/o respect to possible vacant threads in thread pool.
- 30119 Too many SQL statements for clicking at one mail
Frequent JSlob write-back requests initiated by App Suite UI leads to superfluous write operations on database for JSlob-to-config-tree mapped settings storing already present value(s). The server now checks if value intended for update really differs from existing value. So far, no database update operation could be detected e.g. on a mail select.

4. Changes applied

4.1. Changes relevant for Administrators

4.1.1. Changes of Configuration Files

- none -

4.1.2. Changes of Database Schemes

- none -

4.1.3. Changes of Behavior

- none -

- none -

4.1.5. Changes of Libraries/Licenses

- none -

4.2. Changes relevant for Developers

4.2.1. Changes of the HTTP API

- none -

4.2.2. Changes of the RMI API

- none -

4.2.3. Changes of the SOAP API

- none -

4.2.4. Changes of the CLT API

- none -

4.2.5. Changes of the WebDAV API

- none -

4.2.6. Changes of the GUI-API

- none -

5. Tests

The OX QA team has verified all bug fixes.

To avoid side effects the packages have gone through automated smoke and regression test on both, the OX Build System and a distributed OX QA server setup.

In addition all bug fixes have been checked for potential side effects or changed behavior. Unless explicitly stated with one of the bug entries above, we do not expect other side effects.

6. Fixed Bugs

29823, 30119
