1 General Information

This is a compatibility release for the OX App Suite 7.8.4 release.

As additional features it contains multi-tenant support for the Twilio-SMS integration and two library packages which can be used in e.g. custom implementations.

2 Shipped Product and Version

Open-Xchange AppSuite Engineering Services Plugins 1.3.0-rev3

3 Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 1.2.1. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

53781 For the new Blacklist/Whitelist feature some UI notification shows up in English
Translation was marked as fuzzy

4 Changes relevant for Operators

4.1 Changes of Packaging

Change #ES-125 Introduce open-xchange-util-imap component
This package is a library that provides various utilities for IMAP client operations. It currently includes an IMAP authentication feature.

Change #ES-126 Introduce open-xchange-ldap-client component
This package provides an advanced LDAP client library that is used by other Open-Xchange bundles. It includes a centralized configuration of connection pools and failover strategies.

5 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.
To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behaviour. Unless explicitly stated within this document, we do not expect any side-effects.

6 Fixed Bugs
