Find more information about product versions and releases at http://oxpedia.org/wiki/index.php?title=AppSuite:Versioning_and_Numbering and <http://documentation.open-xchange.com/>.

2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 2.10.1.

62076 Replies to Guard emails broken

When replying to an encrypted email, the compose dialog shows the ENCRYPTED mail rather than the proper decrypted content. This also breaks the Guest replies. This is limited to Customer that have the feature setting `io.ox/mail//features/fixContentType=true`.

Now it is possible to reply to Guard emails also `io.ox/mail//features/fixContentType` is "true".

61969 Unknown public key attached to contacts in the address book

This was caused by a blank key inside the database.

Now a "blank" entry is prevented and a NULL is written into the database.

61893 Guard Guest Accounts gives Timeout or Mails are not shown

This was caused by a timeout because guest sessions were not synced between servers.

Now guest sessions are synced between hazelcast server.

3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
