## 2 Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 2.1.0-rev13. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

### **OMF-731 Orchestrator: java.lang.OutOfMemoryError: Java heap space**

Status: Fixed

Root Cause Description:

The JVM starts up with the defaults in terms of memory allocation, which is not enough to process large lists of context IDs when creating windows.

Solution Description:

Specify a heap size to the JVM when starting from within the Docker container for the Orchestrator.

Severity: 3

Components: Orchestrator

Source Directory: cli

## 3 Changes relevant for Operators

### 3.1 Changes of Behavior

#### **Change #OMF-647 Find orphan users on the Target**

Status: Done

Resolution: Done

Components: Orchestrator, Scheduler, Target

Affected Packages: open-xchange-omf-scheduler

#### **Change #OMF-687 Make Docker images use Eclipse Temurin instead of soon deprecated AdoptOpenJDK base images**

Status: Done

Resolution: Done

Components: Orchestrator, Scheduler

Affected Packages: open-xchange-omf-scheduler

#### **Change #OMF-696 List Preprovision Window Results as Text File**

Status: Done

Resolution: Done

Components: Orchestrator

Source Directory: .gitignore

cli

run-shell

shared

#### **Change #OMF-714 Support specifying Batch ID instead of and without Window ID where**

**possible**

Status: Done

Resolution: Done

Components: Orchestrator

Source Directory: cli

**Change #OMF-723 Count Migrated Contexts and Migrated Users**

Status: Done

Resolution: Done

Components: Orchestrator, Scheduler

Affected Packages: open-xchange-omf-scheduler

**Change #OMF-736 Add Scheduler Metrics for Migrated Users**

Status: Done

Resolution: Fixed

Components: Scheduler

Affected Packages: open-xchange-omf-scheduler

## 4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 5 Fixed Bugs

OMF-731,
