2 Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 2.1.0-rev26. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

OMF-819 usernameStrategy configuration value used for contextNameStrategy

Status: Fixed

Root Cause Description:

In {{{com.openexchange.omf.source.dualprovision.impl.DualProvisionConfigRef.load()}}}, the value of the variable {{{usernameStrategyName}}} is passed as the parameter for the value of {{{contextNameStrategyName}}}.

Solution Description:

Needs to fix the implementation to pass the correct value for {{{contextNameStrategyName}}}

Severity: 3

Components: Source

Affected Packages: open-xchange-omf-source-dualprovisioning

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
