## 2 Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 2.1.0-rev24. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

### OMF-702 setting c.o.omf.worker.blackwhitelist.enabled not correctly read

Status: Fixed

Root Cause Description:

The parameter `{{com.openexchange.omf.worker.blackwhitelist.enabled}}` wasn't correctly read as boolean resulting to always being set as `{{true}}`.

Solution Description:

Correctly read the parameter `{{com.openexchange.omf.worker.blackwhitelist.enabled}}` as boolean.

Workaround:

Set `{{blackwhiteListEnabled=false}}` in the per source omf configuration using the orchestrator in order to turn it off.

Severity: 3

Components: Worker General

Affected Packages: open-xchange-omf-worker

### OMF-708 oxDeliveryStatus is not set when class of service does not need to be updated

Status: Fixed

Root Cause Description:

Class of service update created a user cache with only users that needed a class of service update. The cache was then used by the `oxDeliveryStatus` update iterating off of the cached users which was not the complete set.

Solution Description:

Add all users to the cache regardless of if they get a class of service update.

Severity: 3

Components: Worker Cloud-Plugins

Affected Packages: open-xchange-omf-worker

## 3 Changes relevant for Operators

### 3.1 Changes of Behavior

#### Change #OMF-701 Support utf8 encoded DMF passwords

Status: Done

Resolution: Fixed

Components: Worker Mailfilter

Affected Packages: open-xchange-omf-worker

## 4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 5 Fixed Bugs
