2 Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 2.1.0. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

OMF-682 AppSuite file references may not be unique but OMF requires it

Status: Fixed

Root Cause Description:

OMF files_metadata_mapping creates a unique constraint on src_ref and dest_ref even though it's legitimately possible to have non unique values.

Solution Description:

Remove the unique constraint from the columns.

Severity: 3

Components: Scheduler, Worker General

Affected Packages: open-xchange-omf-target
open-xchange-omf-worker

3 Changes relevant for Operators

3.1 Changes of Behavior

Change #OMF-677 REST Migration Status API Client

Status: Done

Resolution: Done

Components: Worker General

Affected Packages: open-xchange-omf-target
open-xchange-omf-worker

4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5 Fixed Bugs
