1 General Information

OX Drive enables users to synchronise files between a variety of devices (phones, tablets and laptops) and OX App Suite. OX Drive consists of two elements: the OX Drive component that is built into OX App Suite and the native OX Drive Apps. These are designed to work together and ensure high usability and a seamless customer experience on different devices.

What's new in OX Drive app v2.12.0 for Windows:

- The display of synchronisation problems has been significantly enhanced. Now there is a badge, on both the system tray icon and the settings window, that is shown if there are unseen notifications.
- If there is a synchronisation problem, the users can now directly open the folder from the message in the notifications list.
- The create sharing link and invitation UI has been redesigned in order to bring it in line with the OX App Suite web UI.
- The Account tab layout, in Settings, has been updated.
- The About tab now contains a link to the "Imprint".
- A new "Show Password" feature has been added to the sign-in screen.
- Other small updates have been made to the interface design, user experience and wording.
- Several bugs have also been fixed.

For details on how to install and update OX Drive please refer to the instructions here:
