1 General Information

The OX Drive app lets users synchronize files between a variety of devices (phones, tablets and laptops) together with OX App Suite. OX Drive actually consists of two elements: the OX Drive component that is built into OX App Suite and the native OX Drive Apps. These are designed to work together to provide a highly usable and seamless customer experience on different devices.

This release fixes some bugs found in the OX Drive app v2.4.3. You will also notice that we have further enhanced the syncing performance, error handling and overall user experience. The use of external storage devices is now supported and the Trash and Download folders are stored on the same drive than your actual OX Drive folder. Additionally, this app introduces optional SQL logging for better debugging and all logs are automatically deleted after 7 days for better privacy. We encourage administrators to install this update. The Public Patch Release is available for all customers with a valid Open-Xchange license.

2 Shipped Product and Version

Open-Xchange Drive Client Generic 2.6.2-rev1

Open-Xchange Drive Help 2.3.0-rev1
