1 Shipped Product and Version

Open-Xchange AppSuite backend 7.6.0-rev12

Open-Xchange AppSuite frontend 7.6.0-rev9

Open-Xchange Documentconverter 7.6.0-rev9

Open-Xchange Documentconverter-api 7.6.0-rev8

2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2066.

31253 "OK" at the beginning of a line in a sieve script leads to error in mail filter parser

Wrong behaviour during parsing of SIEVE script to stop at any "OK" at the beginning of a line caused the problem.

Solution: Quote-aware parsing of SIEVE script content.

33447 Address book search does not show results from folders other than the global address book

The exclusion of the context administrator for search results was implemented using an appropriate SQL clause, however, the used condition also filtered out any other potential match without an internal user ID.

This has been fixed by correcting the 'exclude context admin' condition in the search term passed down to the storage layer.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

31253, 33447,
