OXtender 2 for Microsoft Outlook
Release Notes for Patch Release #2138

August 26, 2014

1   Shipped Product and Version

Open-Xchange OXtender 2 for Microsoft Outlook 7.2.10

Open-Xchange OXUpdater 7.4.2-rev13

2   Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #1986.

22188   Search ribbon for unread mails is disabled
Before this release, full-text indexing has been disabled on purpose to avoid compatibility issues. Now, compatibility with full-text search is given so the corresponding Outlook feature got enabled. Enabling this functionality leads to a one-time message on startup, when the profile configuration gets updated. Users need to restart Outlook once after updating to make use of this change.

31890   Changing backend URL leads to client crashes
When modifying the USM-JSON URL, which got initially configured, the client could not startup anymore. This has been solved.

32129   Client crashes when quickly scrolling through lists
In some cases, the client could crash if a user scrolls through a large mail lists very fast. This was caused by a possible deadlock situation while syncing and has been solved.

33228   PGP mails cannot be displayed
Certain PGP signed mails have been mis-interpreted, leading to issues when displaying the mail. This has been solved by orderly detecting signed mails.

33684   Unable to send mail to specific recipient
A specific contact got corrupted while creating, leading to issues when delivering mail later on. This has been solved by a more robust handling of corrupted data.

3   Changes relevant for Administrators

3.1   Changes of Behaviour

Change #2142   Self-update mechanism has been removed
All updates are now provided through OXUpdater, therefor the self-updating functionality has been removed from OXtender 2 for Microsoft Outlook. Please make sure OXUpdater is installed and running in order to get recent updates quickly.

Change #2141   Support for Outlook 2003 has been discontinued
Microsoft discontinued support for Microsoft Office 2003 on 2014-04-08, therefor we're not able to provide support for this platform anymore. It's no longer possible to install OXtender 2 for Microsoft Outlook on machines running Outlook 2003. Please update to a more recent version of Microsoft Office.

4   Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.
     To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5   Fixed Bugs

22188, 31890, 32129, 33228, 33684,
