1 Shipped Product and Version

Open-Xchange AppSuite backend 7.6.0-rev21

Open-Xchange AppSuite frontend 7.6.0-rev14

Open-Xchange AppSuite USM-rev11

2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2135.

30106 Network Activities not displaying for LinkedIn on Portal

The HTTP request performed against LinkedIn-Service do not have any timeouts applied (neither connect nor read timeout). Meaning, a non-responding LinkedIn-Service will block requesting thread indefinitely.

Requests have a reasonable timeout set. Thus the user will at least see an error in affected portal widget.

This is not a fix for the customer as it does not make the LinkedIn data appear in portal widget, but only ensures that at least the affected tile does not stay unresponsive.

32897 Synchronizing CalDAV fails with OSX 10.10

The latest version of the Mac OS X Calendar application has issues parsing an empty VALARM component in the default alarm properties of CalDAV collections.

This has been fixed by sending empty string for default alarms in CalDAV.

33028 Moved folder will re-appear at old location after next sync

Move of a mail causes implicit folder changes that conflicted with move of that folder.

Now USM automatically marks the folder hierarchy as modified when mail item is moved between folders.

33967 Sent-mails folder is not being synced. Unknown USM status 17

102 Processing interim responses were responded to requesting USM client although not needed. Such interim responses breaks response parsing with used HttpClient instance.

This has been fixed by avoiding 102 Processing interim responses for requests executed by USM component. Such requests are identified by having the "User-Agent" header set to "Open-Xchange USM HTTP Client".

34082 Subfolder behavior on sent items is unexpected

Actual and expected results was mixed up.

"Sent items" and subfolders of "Sent items" now show TO instead of FROM.

34219 Missing "equals" sign in HTML code

Added missing "=".

34222 Text is losing format after replying to an email

The UI code removes text color within blockquotes to keep them simple and legible. At least that's the idea. Now we maintain original colors (to avoid irritation).

34281 Read_Stream calls on Facebook shows warning about non-approval

Facebook made access to permissions more restrictive since April 30th 2014.

This has been fixed by removing these permissions, because they were unused.

34346 Layout issue (german language settings) for folder settings within external email accounts

Markup wasn't correct. Had just one form-group for all rows.

Using `<div class="form-group">` for each row now.

34361 Appointment create/delete/update events not fired when primary mail address contains upper case characters

Case sensitive check for organizer mail address where the storage only contains the lower case version.

This has been fixed by making the check case insensitive.

34365 SVL-0011 Categories=ERROR Message='Unexpected error: Can't convert from null'

Used native converter for null values.

Please be aware that we cannot definitely say if the mentioned change was really the culprit for the observed error messages. We just got a stacktrace, without any further information about reproducibility, and this is where the changes were based on.

3 Tests

Not all issues that got resolved with this Patch Release could be reproduced within the OX QA lab. Therefore, we advise guided and close monitoring of the reported issue when deploying to a staging or production environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

30106, 32897, 33028, 33967, 34082, 34219, 34222, 34281, 34346, 34361, 34365,
