2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Release 7.8.0.

41894 OXUpdater fails to download new OXUpdater package
The product name led to names of binary files which need proper URL encoding in download URLs. The lack of that encoding leads to broken download URLs.
This was fixed by always applying proper encoding when compiling URLs for update.xml.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
