## 2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #3262.

### **45089 "Edit as new" not working for encrypted mail**

Editing Office documents with OX Documents from within a encrypted E-Mail was offered but did fail when loading the document. We're working on a more integrated approach and for now disabled this option to avoid that users are running into that problem.

## 3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs

45089,
