

Release Notes for Public Patch Release #1234 (2012-12-13)

1. Origin Product/Version

OX6 v6.22.1 Rev 7

2. Packages shipped with this Patch Release

This Patch Release fixes bugs for the following products:

- Open-Xchange Server 6
(Version: v6.22.1 Rev 8 built 2012-12-12)

3. Bugs Fixed with this Patch Release

Open-Xchange Server 6

- 23881 Java Memory Leak
Backport to previous JCS library.
- 23994 Google calendar refresh not working
The return code of the subscription update is now returned always.
- 24035 Distribution list entries mismatch between DB and GUI after update to 6.22.1
Corrected wrong contact references of distribution list members.

4. Changes relevant for Administrators

Changes of Configuration Files

Change #1247 - Added property to enable/disable Hazelcast bundle

Added property "com.openexchange.hazelcast.enabled" to file 'hazelcast.properties'.
Default for 6.22.1 is "false".

Changes of Database Schemes

Change #1246 - Database update task to correct wrong distribution list references

Due to a former change of the behavior some references to contacts from the distribution list table may be wrong.

Distribution list members that refer to other contacts are dereferenced dynamically with the new contact service implementation. This is done using the entry ID of the distribution list member ("intfield02" in "prg_dlist"), that links to the object ID of the actual contact ("intfield01" in "prg_contacts").

The user- and object-IDs are mixed up here. Before the fix for bug #15976, the web front-end preferred to set the internal user ID in the referencing field of the distribution list member, after the bug-fix this was changed to the referenced contact's object ID (which is correct).

The problem now exists for distribution list members that were created from the global address book before the bug-fix. We'll need a database update task to correct that.

To fix the wrong references, a database update task was added that first tries to correct the wrong references to the user ID, then changes those references that can't be auto-corrected to independent distribution list entries.

Changes of Command Line Tools

- none -

Changes of Behavior

- none -

Changes of Packaging

- none -

Changes of Front-End Customizations

All CSS changes and a list of new and changed icons can be found on our wiki page documenting the Theme changes for each version:
<http://oxpedia.org/wiki/index.php?title=ThemeChanges>

5. Changes relevant for Developers

Changes of the HTTP API

- none -

Changes of the RMI API

- none -

Changes of the SOAP API

- none -

Changes of the WebDAV API

- none -

Changes of the GUI-API

- none -

6. Tests

The OX QA team has verified all bug fixes.

To avoid side effects the packages have gone through automated smoke and regression test on both, the OX Build System and a distributed OX QA server setup.

In addition all bug fixes have been checked for potential side effects or changed behavior. Unless explicitly stated with one of the bug entries above, we do not expect other side effects.

7. Fixed Bugs

23881, 23994, 24035
