## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #4095.

### 54512 Alias can not be deleted

Deleted alias moved to deleted tree and before it got removed from the user entry, the method `checkDomainAndAliasAndRemoveFromDeletedTree` throws an error which then led to the alias staying into the user AND existing into the deleted tree.

This has been solved by calling method `checkDomainAndAliasAndRemoveFromDeletedTree` before doing further write operations.

## 3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behaviour. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs
