## 1 Shipped Product and Version

Open-Xchange USM 7.4.2-rev8

Open-Xchange OXUpdater 7.4.2-rev9

Open-Xchange OXtender 2 for Microsoft Outlook 7.2.7

## 2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #1900.

### **31236 Mail could not be found in folder default0/INBOX**

The client synchronized moves of items between folders that are out of sync.

This has been fixed by modifying USM to report a special response error code for objects that cannot be moved because they are no longer in the source-folder.

### **31250 Email has duplicate when you move it to other folder**

New destination sync id was overwritten when sending the response to the moveitems command with an old one.

The fix make sure that the new destination sync id doesn't get overwritten and is correctly reported to the client.

## 3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All bug fixes have been checked for potential side effects and changed behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs
