2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Release 1.0.0.

37292 Rendering inefficiency in some list views
Integration to OX AppSuite has been enhanced to avoid superfluous instantiation of certain views. This benefits overall client responsiveness.

37290 Removing static IP address for Flash fall-back
The end-point for flash-fallback communication was hard-coded, this has been solved by dynamically using a end-point provided via configuration by the Voiceworks backend.

36961 Unable to delete conversations
A compatibility enhancement to OX AppSuite 7.6.2 has been introduced. Before, some conversations in OX Messenger could not be deleted.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

37292, 37290, 36961,
