## 1 Shipped Product and Version

Open-Xchange Guard 2.2.0-rev7

Find more information about product versions and releases at [http://oxpedia.org/wiki/index.php?title=AppSuite:Versioning\\_and\\_Numbering](http://oxpedia.org/wiki/index.php?title=AppSuite:Versioning_and_Numbering)

## 2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Release 2.2.0.

### **41747 Mail attachment lost when sending with guard**

Sometimes attachments are missing which got sent via Guard. Guard wasn't recognizing the need to pull the attachment.

Now no attachment will be lost when forwarding an email with this fix.

### **41837 Can't decrypt mail in tab**

It was not possible to decrypt a guard mail in a new tab in full screen mode.

Fix manifest for calling Guard UI when full screen email displayed to solve this problem.

### **42370 Files are always encrypted when uploading**

Once an encrypted file was uploaded, all additional uploads are encrypted.

With this fix the user is able to upload files without encrypting them, after an encrypted upload.

## 3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs

41747, 41837, 42370,
