2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #3228.

45081 Emoticons not displayed in portal mail widget
Subject was not processed by Appsuite emoji utility.
Solution: Process subject with our emoji utility to display those also on the portal widget.

45210 Google drive available without open-xchange-file-storage-googledrive
Only checked the Oauth capabilities but not the available filestorage services.
This has been fixed by also checking available Filestorage services to determine if a filestorage can be added.

44888 Groups not shown in "Find a free time period"
Regression introduced by porting to new "participants view" and group members not expanded correctly if added from appointment edit view.
This has been fixed by correctly expanding groups in the two cases mentioned above.

44809 No-reply transport without authentication not possible
It was not allowed to specify empty login/password for the no-reply transport configuration.
This has been fixed by allowing empty login/password when configuring the no-reply transport.

45078 NPE at c.o.publish.CachingLoader$PublicationKey
NullPointerException if an user tried to download a publication from a link.
This has been solved by adding a nullguard.

3 Tests

Not all defects that got resolved could be reproduced within the OX QA lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

45081, 45210, 44888, 44809, 45078,
