

Release Notes for Patch Release #3730

November 21, 2016

Security Patch Release

This Patch Release addresses critical vulnerabilities; please consider deploying it as soon as possible. Not deploying this Patch Release may result in remote service exploitation, security threats to users and exposure of sensitive data.

Detailed vulnerability descriptions will be publicly disclosed no earlier than five (5) working days after public availability of this Patch Release. There is no indication that one or more of these vulnerabilities are already getting exploited or that information about them is publicly circulating.

2 Vulnerabilities fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #3629. Solutions for vulnerabilities have been provided for the existing code-base via Patch Releases.

49014 CVE-2016-9309
CVSS: 5.3

49439 CVE-2016-9308
CVSS: 4.1

49847 CVE-2016-9309
CVSS: 3.7

49848 CVE-2016-9308
CVSS: 5.7

49912 CVE-2016-9309
CVSS: 4.3

3 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #3629.

48520 Printing with edge not working

Print preview was empty and printing does not print the email content.
Now the preview is displayed and it is possible to print with edge.

49141 Mail content only displayed on reply/forward

Mail content were not visible in all mails, actual mail content nested inside <head>element, which is removed for embedded display of foreign HTML content.
Transfer non-head child elements to body to make the content visible.

49236 Huge amount of Mail folder could not be found on mail server messages for non-existing folders

The message for "Mail folder could not be found on mail server" were known, actually by design, but not expected to happen that often.
The fix just excludes the inbox from the obfuscation, to reduce the amount of error messages.

49693 OX error- Message could not be found in the folder

Adjusted logging to not flood log files and have a more adequate log level for common cases in which an image cannot be retrieved.

49869 Upsell not triggered in onboard wizard for updater

No handling for caps with digits.

Adjusts regex and adds error message when trying to use commas in params.

4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behaviour. Unless explicitly stated within this document, we do not expect any side-effects.

5 Fixed Bugs

48520, 49141, 49236, 49693, 49869, 49014, 49439, 49847, 49848, 49912,
