## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #4425.

### **55788 Save in drive for webmail user not usable**

General problem that might occur if an action gets chained.  
Once an undefined list element was present the check always returned true now("draw it").

### **55776 Spamexperts not working with https**

Basic-auth information only provided in "Authorization" header for HTTP protocol, but not for HTTPS.

This has been solved by always providing basic-auth information in "Authorization" header regardless of used protocol and refactored to use newer HttpClient library.

### **55748 Wrong sieve rule written when using "start/end with"**

The 'starts with' and 'ends with' simplified rules got mixed up.  
Properly parse starts- and ends with match types to solve this issue.

### **555692 Mobile UI changes layout in jslob**

Jslob saves also stores fixed settings that are applied for smartphones only.  
This has been fixed by not saving 'layout', 'showContactPictures' and 'showCheckboxes' for mobile devices.

### **55583 OX Help Docs language error on Calendar module header**

The header of the respective file was adjusted to get the right translation.

### **55574 Wrong sort order when using flag as sort option**

Sortorder was adjusted. Note: Selecting a specific sort field (other than "date") when mails are grouped by conversations might still yield "strange" results since a conversation's mails are statically sorted by "date" and only the top mail of each conversations is considered for sorting the conversation groups. Having a flagged mail in the midst of a conversation does not sort that mail to the top since only conversation's newest mail is considered.

### **55362 Translation missing on upload timeout error**

Added missing translation.

### **55298 Maximum configured sized needs to be fixed for Japanese Error message**

Fixed translation for "Maximum configured sized".

### **55284 Possible to change threadSupport if protected**

We had no consistently check if threadSupport was enabled.  
in case 'threadSupport' is disabled also a potentially active folder viewoption 'thread' is ignored to solve this issue.

### **3 Tests**

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behaviour. Unless explicitly stated within this document, we do not expect any side-effects.

### **4 Fixed Bugs**

55788, 55776, 55748, 555692, 55583, 55574, 55362, 55298, 55284,
