

Open-Xchange OXtender for Mobile Web Initial Release

Release Notes v1.01

Release Date: 2009-05-13

1. About this Release

The OXtender for Mobile Web lets you access (read only at the moment) data from Open-Xchange Server with your iPhone or other internet enabled devices. Data of the following modules can be accessed:

- Calendar
- Contacts
- Tasks

Open-Xchange is eagerly interested in learning about bugs, specifically in your specific runtime environment. If you experience any misbehaviors, please report bugs via our public Bugzilla:

<http://bugs.open-xchange.com>

- Product: OXtender for Mobile Web
Version: Initial Release (2009-05-12)

Please don't forget to report your device and if known the browser version!

 - Clicking on phone numbers automatically dials the number
 - Clicking on an address opens the location at google maps
- Tasks list showing all tasks from your private folder
- Detailed task view

4. Known Issues

4.1. Limitations of this Version

. Graphics Settings

Depending on your browser and your browser settings you may not be able to see graphics. Since buttons for switching between the OX modules are implemented as graphics, you may not see these menu buttons.

Workaround: Please make sure to activate graphics in your browser settings. In a future release labels will be shown in addition to graphics to make those buttons visible no matter what settings have been chosen.

. General / System

Due to a bug in PHP version $\leq 5.2.0-8$ dates may be displayed wrong. This does not happen with PHP version $\geq 5.2.6$. We are still searching for a workaround.

. Calendar

- Appointment series
- Exceptions aren't shown correctly in the calendar list view

4.2. Known bugs

List of known bugs of severity major or worse

- none -
