

Release Notes OXtender for Microsoft Outlook Public PTF (2009-12-16)

1. Origin Product/Version

OXtender for Microsoft Outlook 6.14.1 (2009-12-01)

2. Packages shipped with this PTF Release

OXtender for Microsoft Outlook 6.14.3 (2009-12-14)

3. Bugs fixed with this PTF Release

- 15026 Automatic OXUpdater configuration for Outlook-Oxtender makes Addressbook unusable in new Mail
After generating a mail profile automatically by the OXtender installer address books didn't work in Outlook and sometimes PST format was 97-2002 instead of Unicode. Now address books are available and format is Unicode.
No potential side effects.
- 15048 Deactivated modules are still synced if Outlook was not closed after saving changes
After deactivating a module in the OXtender menu and closing the form, the module was reactivated. Now it stays deactivated.
No potential side effects.
- 13533 Deleted appointments in shared folders synced to everyone's "Deleted Objects" in Outlook
Deleted items from shared or public folders were moved to the local trash even if the user wasn't participant. Now this items were deleted directly.
No potential side effects.

4. Tests

The OX QA team has verified all bug fixes and tested the basic functionality (Smoke tests).

5. Side effects

Tests have not shown any functional loss or any loss of data.
