3. Bugs fixed with this PTF Release

- 16450 E-Mail timestamps are +2 hours for Nokia and WinMob clients
Sending the correct timestamp to Nokia and Windows Mobile Devices.
No side effects.
- 16683 iPhone shows sync date of mails instead of receive date in IMAP server
The patch for bug #15567 was missing a flag, which caused the
received date/time to be transmitted in the wrong format. The iPhone
couldn't parse that date/time and displayed the current date/time
instead. The flag is now correctly set.
No side effects.
