1 General Information

Dovecot Anti-Abuse Shield is included with Dovecot Pro and works with both Dovecot Pro and OX App Suite as a component to protect against login/authentication abuse.

Anti-Abuse Shield runs on a cluster of servers, and integrates with OX App Suite and Dovecot to detect abuse, brute force attacks and also to enforce common authentication/authorization policies across the platform.

Please note: Dovecot Anti-Abuse Shield is only available for customers who have a valid Dovecot Pro license and Dovecot Pro v2.2.25.1. onwards.

New Features include:

- **Persistend Replicated Blacklists:** Anti-Abuse Shield is able to store permanent or time-expiring entries for IP addresses and logins which are blacklisted. Blacklist entries are optionally persisted in a Redis DB, and can be replicated to all cluster members. Blacklist entries can be viewed and manipulated through Lua scripts or via the HTTP REST API.
- **Webhooks** can be configured to send events to configured webhook endpoints, such as analytics solutions, through HTTP(S). The following events can be sent via a webhook: Report, Allow, Add Blacklist Entry, Delete Blacklist Entry and Expire Blacklist Entry.

A more detailed overview of the main functions and features of Dovecot Anti-Abuse Shield can be found at: <https://www.open-xchange.com/portfolio/whats-new/>

A Whitepaper can be found at: http://software.open-xchange.com/products/appsuite/doc/Whitepaper_Dovecot_Anti_Abuse_Shield.pdf.
