2 Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 1.7.2-rev3. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

PLG-380 Recently added group displays in Address Book only after server restart

Status: Fixed

Root Cause Description:

No proper invalidation of group folder mappings after internal group create event

Solution Description:

Properly invalidate group folder mappings after internal group create event

Severity: 3

Components: contact-storage-group (mw)

Labels: L3

Affected Packages: open-xchange-plugins-contact-storage-group

PLG-384 Occasional wrong results when querying the list of black or white entries

Status: Fixed

Root Cause Description:

Multiple non-threadsafe variable access in the implementation lead to race conditions.

Solution Description:

Properly implement immutability and thread-safety by using final attributes.

Severity: 3

Components: blackwhitelist (mw)

Labels: L3

Affected Packages: open-xchange-plugins-blackwhitelist

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
