2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 1.4.5.

PLG-134 Minimal API: Settings pane is shown although default consent is enabled

Settings pane didn't check for default consent.

This has been solved by introducing a new API call to check whether or not default consent is configured and won't show the pane anymore in this case.

3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

PLG-134,
