## 1 Shipped Version

OX App Suite Public Sector Plugins 7.10.6-rev7

Find more information about product versions and releases at [http://oxpedia.org/wiki/index.php?title=AppSuite:Versioning\\_and\\_Numbering](http://oxpedia.org/wiki/index.php?title=AppSuite:Versioning_and_Numbering) and <http://documentation.open-xchange.com/>.

## 2 Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 7.10.6-rev3. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

### **PBSR-512** Missing error handling for MAV integration

Status: Done

Root Cause Description:

Error handling not implemented. Reopen: Error message after editing an appointment was shown in the edit appointment dialog, which is closed at this point.

Solution Description:

Implemented error handling. Reopen: Show the error message at the top of the browser window.

Resolution: Verified

Severity: 3

Components: AppSuite UI Customization

Verified with Builds: public-sector-7.10.6-rev7

Affected Packages: open-xchange-appsuite-public-sector

### **PBSR-536** OX apps have internal icons instead of configured ones

Status: Done

Root Cause Description:

A race condition between downloading the {{navigation.json}} and creating the launcher menu.

Solution Description:

After downloading {{navigation.json}} update icons in already created apps.

Resolution: Verified

Severity: 3

Components: AppSuite UI Customization

Verified with Builds: public-sector-7.10.6-rev7

Affected Packages: open-xchange-appsuite-public-sector

## 3 Changes relevant for Operators

### 3.1 Changes of Behavior

#### **Change #PBSR-511** Changes to the Central Navigation API

Status: Done

Resolution: Done

Components: AppSuite UI Customization

Affected Packages: open-xchange-appsuite-public-sector

**Change #PBSR-513 Add CSRF protection to ICS API**

Status: Done

Resolution: Done

Components: AppSuite UI Customization

## 4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

### 4.1 Test Report

**Test T1756098 Add secondaryaccount for several users (public-sector-7.10.6-rev7\_RW-2831)**

Status: Passed
