## 1 Shipped Product and Version

Open-Xchange Cloud Plugins 1.8.3-rev8

Find more information about product versions and releases at [http://oxpedia.org/wiki/index.php?title=AppSuite:Versioning\\_and\\_Numbering](http://oxpedia.org/wiki/index.php?title=AppSuite:Versioning_and_Numbering) and <http://documentation.open-xchange.com/>.

## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 1.8.3.

### **62734 Mail-Domain removed from context ldap entry while users exist for the domain**

Filter for existsFurtherDomainUsage did not work if '\*' is escaped and cleanupDomains did not calculate the list of aliases if the number of old and new was equal.

This has been fixed by implementing correct filter for the existsFurtherDomainUsage and cleanup-Domains now always calculates the list of aliases.

## 3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs

62734,
