## 1 Shipped Product and Version

Open-Xchange Cloud Plugins 1.10.0-rev4

Find more information about product versions and releases at [http://oxpedia.org/wiki/index.php?title=AppSuite:Versioning\\_and\\_Numbering](http://oxpedia.org/wiki/index.php?title=AppSuite:Versioning_and_Numbering) and <http://documentation.open-xchange.com/>.

## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 1.10.0-rev3.

### **CP-231 NPE in Context provisioning API calls in case no contextname is specified**

Added a NULL check because in the new beforeContextDbLookup introduced for CP-189 it is not guaranteed that the context name has been set.

### **CP-233 automatically setting taxonomy/type is not working as intended**

Automatically adding brand and sub-brand (in case it is one) to taxonomy/type on context creation.

## 3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs

CP-231, CP-233,
