2 Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 1.11.1. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

CP-251 OpenAPI: "OxAntiPhishingObject" does not exist

Fixed OpenAPI documentation

Status: Fixed

Root Cause Description:

Deprecated file reference in OpenAPI YAML file

Solution Description:

Replaced the file reference with the correct one

Severity: 3

Source Directory: http-api

CP-260 Missing entry in LDAP blocks context/user deletion

Missing context or user entries in LDAP don't fail context or user deletion operations any more. Instead, they are logged as warnings, but the operation then proceeds with removing those objects from the database.

Status: Done

Root Cause Description:

missing context or user entry would be thrown as Exception.

Solution Description:

Only log missing entries and don't stop deletion.

Resolution: Verified

Severity: 3

Verified with Builds: cloud-plugins-1.11.2-rev4

Affected Packages: open-xchange-cloudplugins

CP-265 Black-/Whitelist handling doesn't work in sub-brand scenarios

Status: Done

Root Cause Description:

See bug description.

Solution Description:

Introduces a new handling of black-/whitelist entries:

- The required sub-trees will be created automatically now on demand
- It does not make sense to create these subtrees with every sub-brand since it might not even be needed.
- Removed configuration properties

Resolution: Verified

Severity: 3

Verified with Builds: cloud-plugins-1.11.2-rev6

Labels: L3

Affected Packages: open-xchange-cloudplugins-blackwhitelist-ldap

4 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.
