2 Bugs fixed with this Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Release 7.6.3. Some of the announced bug fixes may have already been fixed at the existing code-base via Patch Releases.

ONM-5 Apache timeouts are not set

Status: Done

Root Cause Description:

apache connection config not set

Solution Description:

set apache client connection options at startup

Resolution: Verification not Possible

Severity: 2

OTRS Ticketnumbers: 2021020110000141

Affected Packages: open-xchange-onmobile

3 Tests

Not all defects that got resolved could be reproduced within the lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

3.1 Test Report

Test T1690708 The normal module top-bar is not visible (R6.14.0)

Status: Passed

The customized UI has no module switcher (e.g. Calendar, Address Book,...) like the normal UI.

Test T1690709 Common list style (R6.14.0)

Status: Passed

The lists used in the UI should be styled in a common way.

Test T1690710 Checkbox with text style (R6.14.0)

Status: Passed

A checkbox with text is the "tout sélectionner" checkbox above the list.

Test T1690711 Select all list items at once (R6.14.0)

Status: Passed

Over the mail list is a checkbox labelled with "tout sélectionner" (select all).

Test T1690712 Blocking theme and apps (R6.14.0)

Status: Passed

Test T1690713 Ads on top of mails list (R6.14.0)

Status: Passed

Test T1690714 Migrate SIEVE settings (R6.14.0)

Status: Passed

Test T1690715 Migrate user settings (R6.14.0)

Status: Passed

Test T1690716 Webmail statistics (R6.14.0)

Status: Passed

Webmail related statistics are being computed and provided as JSON by our JMX/Jolokia interface. Stats are being read from the database, updated once a day (or after middleware restart) and do currently not include Sieve/IMAP related settings.

Test T1690717 Mail quota (R6.14.0)

Status: Passed

Below the folder tree a quota widget is shown which should display the used and total quota. It also contains a link to buy more storage. Its URL is configurable by the ConfigCascade setting fr.in8//moreSpaceURL.

Test T1690718 Save embedded images (R6.14.0)

Status: Passed

Many users complain because they can't save embedded images (in signature or in email body). In Newmail webmail, the right clic on Embedded image is deactivated (like in standard product) and the Embedded image is not attached to the email because of the defect QC 3423 / bugzilla 52452 (Image from signature is considered as an attached file) In OX standard product, the right clic on Embedded image is not possible either but the image is attached to the email. Orange requests OX to rollback this fix to allow users saving embedded images : embedded images should be attached to the email. Orange requests OX to integrate this change request in OX R6.9.

Test T1690719 Read/unread state and date (R6.14.0)

Status: Passed

For all folders and all templates, the unread mails are in bold and the read mails in normal. The date format used in the lists is: - the hour (hh:mm) if the mail is received/sent/created today - the day (or yesterday) in french if the mail is received/sent/created in the current week. - the date (dd/mm/yy) if the mail is created/received/sent in other time. [Link](#)

Test T1690720 Use different mail views (R6.14.0)

Status: Passed

The user can switch between three different mail views. See the attached screenshot as reference: - Full list (template 1) - Vertical split (template 2) - Horizontal split (template 3).

Test T1690721 Use keyboard shortcuts in list views (R6.14.0)

Status: Passed

It should be possible to use some functions of the UI with keyboard shortcuts in the list views. Because there are no free-text entry fields the shortcuts can be very simple and don't need to use special modifier keys like Ctrl or Shift. It should be possible to easily discover these keyboard shortcuts by indicating the characters in parentheses after the tooltip text of their corresponding action bar entry.

Test T1690722 Mail list icon and text order (R6.14.0)

Status: Passed

The mail list should have the following order in the vertical and list view: - Checkbox - Icon (reply, transfer) - important message icon - sender address - subject - attachment icon (if the mail has any attachment) - time ([Link](#))

Test T1690723 Sort mails by different criteria (R6.14.0)

Status: Passed

Mails can be sorted by the following criteria: - date - expéditeur - objet - taille - non lus Not available should be - colour - conversation

Test T1690724 Open mail by double click (R6.14.0)

Status: Passed

Double-click in a split view should open the clicked mail in the detail view.

Test T1690725 Display of read/unread emails (R6.14.0)

Status: Passed

Test T1690726 Navigation from a selected email to the next (R6.14.0)

Status: Passed

Test T1690727 Default sorting (R6.14.0)

Status: Passed

Test T1690728 Display of the list view (R6.14.0)

Status: Passed

Original Requirement got superseded by MSG-WM-F-EML-31-008, REQ-WM-F-EML-31-019 and probably some unknown specs...

Test T1690729 Basic mail detail view structure (R6.14.0)

Status: Passed

The mail detail view must have the following structure: - subject - From/To - From/Date/to - all mail headers - attachments - body

Test T1690730 Display of thumbnails (R6.14.0)

Status: Passed

Test T1690731 Search a mail only by subject (R6.14.0)

Status: Passed

Test T1690732 History for simple searches (R6.14.0)

Status: Passed

The last three (simple, not advanced) searches should be saved as history.

Test T1690733 Search for mails in a time range (R6.14.0)

Status: Passed

For cases, where the date is the most precise search criterion, and to avoid displaying all newer mails when searching for very old mails, a generic facet for date ranges is required. The date is selected via two date picker widgets for the start and end date of the time range to search.

Test T1690734 Simple search - Autocompletion display (R6.14.0)

Status: Passed

REQ-WM-F-EML-14-055 The system shall trigger the auto-completion action when at least 1 character is typed.

Test T1690735 Message in empty folders (R6.14.0)

Status: Passed

Test T1690736 Create a new folder while moving a mail (R6.14.0)

Status: Passed

The roll over on the button "déplacer vers" displays a tooltip with the text "déplacer vers un dossier" and a change of color. The action of a click on the button "déplacer vers" will involve a change of color.

Test T1690737 Create a personal mail folder (R6.14.0)

Status: Passed

Test T1690738 Empty Drafts folder (R6.14.0)

Status: Passed

Test T1690739 Delete a personal folder (R6.14.0)

Status: Passed

Test T1690740 Contextual menus (R6.14.0)

Status: Passed

Orange wants to update the contextual menus on alias dedicated folder in the left menu in the webmail. The objective of this change is to give to end-users more information about the possible actions, and avoid the end-user to execute unwanted actions.

Test T1690741 Open the media player (R6.14.0)

Status: Passed

Images attached to an email are displayed as a slideshow.

Test T1690742 Rotate an image (R6.14.0)

Status: Passed

It is possible to rotate a picture inside the media player.

Test T1690743 Launch image viewer from mail (R6.14.0)

Status: Passed

Test T1690744 Launch video player from mail (R6.14.0)

Status: Passed

Test T1690745 Launch audio player from mail (R6.14.0)

Status: Passed

Test T1690746 Launch multimedia player from mail (R6.14.0)

Status: Passed

Test T1690747 Launch slideshow player from mail (R6.14.0)

Status: Passed

Test T1690748 Documents preview (R6.14.0)

Status: Passed

OX Documents Preview has been deployed to the platform to allow preview of office documents, it's integrated to the "Media Player" feature.

Test T1690749 Close mail compose by clicking the folder tree (R6.14.0)

Status: Passed

When writing a mail, the left menu should clear the selection. When the user clicks on a folder, the mail compose view should be closed and the selected folder contents should be shown. If the mail was edited, the standard dialog about saving or discarding the mail should be shown before the mail compose view is closed.

Test T1690750 Autocompletion on the "To" field (R6.14.0)

Status: Passed

Test T1690751 Add recipient from Address Book (R6.14.0)

Status: Passed

Test T1690752 Send Mail with button or keyboard shortcut (R6.14.0)

Status: Passed

Test T1690753 Remove all attachments at once (R6.14.0)

Status: Passed

On mail compose, a button "tout supprimer" should allow user to remove all attachments added to current mail.

Test T1690754 Send mails with big attachments in the background (R6.14.0)

Status: Passed

Due to the removal of the toolbar, the user can't switch away from a big mail while it is being uploaded to the server. This makes the UI unusable for the duration of the upload. The upload shall happen in the background. All current uploads shall be displayed in an indicator in the bottom right *corner* of the screen.

Test T1690755 Move one or several mails to another folder (R6.14.0)

Status: Passed

Test T1690756 Move one or several mails to Spam (R6.14.0)

Status: Passed

Test T1690757 Delete mails (physical deletion) (R6.14.0)

Status: Passed

Test T1690758 Mark as read/unread one or several selected email (R6.14.0)

Status: Passed

Test T1690759 Tag mail(s) as SPAM (R6.14.0)

Status: Passed

Test T1690760 Delete attachments in draft (R6.14.0)

Status: Passed

Test T1690761 Elements of the action bar in the Inbox (R6.14.0)

Status: Passed

Test T1690762 Elements of the action bar in the Inbox without selection (R6.14.0)

Status: Passed

If no mail is selected, the action bar must have the search, the button "nouveau (new)" and the 3 picto (refresh/help and parameters).

Test T1690763 Elements of the action bar in the mail detail view (R6.14.0)

Status: Passed

Test T1690764 Elements of the action bar in the trash folder (R6.14.0)

Status: Passed

Test T1690765 Elements of the action bar in the sent folder (R6.14.0)

Status: Passed

Test T1690766 Elements of the action bar in the spam folder (R6.14.0)

Status: Passed

Test T1690767 Elements of the action bar in the drafts folder (R6.14.0)

Status: Passed

Test T1690768 Search section in the action bar (R6.14.0)

Status: Passed

The action bar always contains the search input at the left side.

Test T1690769 Buttons in the action bar (R6.14.0)

Status: Passed

The action bar contains always the three icons reload, help and settings.

Test T1690770 Manage "alias" accounts (R6.14.0)

Status: Failed

Test T1690771 Create an "alias" account (R6.14.0)

Status: Failed

Test T1690772 Modify an "alias" account (R6.14.0)

Status: Failed

Test T1690773 Delete an "alias" account (R6.14.0)

Status: Failed

Test T1690774 Add more than 5 alias (R6.14.0)

Status: Failed

Test T1690775 Create a signature with image (R6.14.0)

Status: Passed

Limit image size in signatures to 3 MB.

Test T1690776 Deleted mails are moved to trash (R6.14.0)

Status: Passed

Deleted messages can be kept in the trash folder for 7 days or deleted directly, with the option to confirm.

Test T1690777 Change primary password (R6.14.0)

Status: Passed

Test T1690778 Change mail accounts display name (R6.14.0)

Status: Passed

Test T1690779 Manage black/whitelists for mail addresses (R6.14.0)

Status: Passed

Test T1690780 Subscribe to Gigamail (R6.14.0)

Status: Passed

Test T1690781 Welcome Panel (R6.14.0)

Status: Passed

[Link](#) The welcome panel is displayed directly after the login.

Test T1690782 Animated Zone (R6.14.0)

Status: Passed

[Link](#) The animated zone is a small area below the folder tree.

Test T1690783 One-shot Bubbles (R6.14.0)

Status: Passed

[Link](#) The bubbles occur, if an element becomes visible for which a handler is registered.

Test T1690784 Enable tracking (R6.14.0)

Status: Passed

This has been changed with INU-1215 from ComScore to Tealium. This cannot be tested locally.

Test T1690785 General availability of user tracking (R6.14.0)

Status: Passed

Test T1690786 Contact popup (R6.14.0)

Status: Passed

If you click on any mail recipient, a contact popup is shown.

Test T1690787 Create contact based on mail sender/recipient (R6.14.0)

Status: Passed
