1 Shipped Product and Version

Open-Xchange AppSuite backend 7.6.0-rev11

Open-Xchange AppSuite frontend 7.6.0-rev8

Open-Xchange Documentconverter 7.6.0-rev8

Open-Xchange Office 7.6.0-rev8

2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2059.

33273 Uploading another chunk to a drive file with drive client fails with s3 storage
The S3 implementation was designed to separate the data of each context in a separate S3 bucket. A unique bucket naming restriction as well as a limit of 100 buckets per account break this concept. This has been fixed by switching to a root bucket name per S3 filestore registration and separate context data using fixed prefixes and delimiters.

33141 Typo in German online documentation
Typo is fixed with this version.

33368 Handling of inline images from within web UI unintuitive and buggy
Fixed with new little bit more intuitive inline image dialog.

33402 Distribution lists cannot be printed
Now distribution lists can be printed. First io.ox/contacts//features/printList=list must be set in appsuite.properties.

33430 Mailfilter put action stop as first action if other actions are added later, leaving a broken filter rule
If there is a stop action, it is now always at the last position.

33446 Session obtained via TokenLogin can not autologin
Cookie open-xchange-session-... missing;There was no ”store” after ”action=tokens”.
Works now: Initial token-based login as well as subsequent auto-logins. Added a ”store” after ”action=tokens”.

33460 Update-themes-rhino.js does not generate theme
Definitions.less and <themeName>/definitions.less would have been mapped to definitions.less only, so the custom definitions.less was never loaded with this code.
Solution is to try to load the file directly and if that fails, try to load the file without the directory part.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

33273, 33141, 33368, 33402, 33430, 33446, 33460,
