1 Shipped Product and Version

Open-Xchange AppSuite backend 7.4.2-rev37

2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2212.

34510 Invalid content type in response: text/javascript

charset=utf-8;The problem was that USM tried to download a mail attachment that obviously does not exist (anymore). Instead of the attachment's data, a JSON error response is returned, thus HTTP response has its Content-Type set to "text/javascript; charset=utf-8".

Solution: Output standard HTML error page if requested resource appears not to be in JSON output format.

3 Tests

Not all issues that got resolved with this Patch Release could be reproduced within the OX QA lab. Therefore, we advise guided and close monitoring of the reported issue when deploying to a staging or production environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

34510,
