1 Shipped Product and Version

Open-Xchange AppSuite backend 7.6.0-rev29

2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2237.

35255 Severe CPU usage when attachments have content type text/html

The file extensions was not considered in case a mail part claims to hold HTML by "Content-Type" header.

This has been fixed by applying sanitizing to binary content (e.g. from a PDF file) that are meant to only work for HTML content lead to heavy CPU utilization.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

35255,
